

mode™

Introducing Mode, a contemporary lightweight, durable banqueting chair from the world's leading ergonomics company. Combining a modern, sleek aesthetic with ultimate comfort, Mode represents the new direction of hospitality seating.

Ergonomic Comfort

Mode combines functionality and comfort, offering up to 12 degrees of recline to encourage spontaneous movement. Created with Humanscale's signature ergonomic seating expertise, the Mode banqueting chair also features contoured cushioning to support the body's natural curves and a molded waterfall seat to reduce pressure on the back of the knees.

Sleek Aesthetic

Traditionally, banqueting chairs feature a dated aesthetic. Not Mode. In fact, Mode looks like no other chair on the market. Built with a timeless design, Mode readily complements today's modern spaces. The hand hold has been seamlessly integrated into the back, allowing the chair to be not only beautiful, but functional, too. Merging ease of use with a unique aesthetic, Mode sets itself apart from other banqueting chairs, making it ideal for next-generation environments.

Lightweight Structure

Made from a glass-filled nylon frame with aluminum legs, Mode is lightweight (16 pounds without arms; 17.5 pounds with arms) and portable. With modular seat cushions that weigh just 2.5 pounds or less, Mode helps users reduce shipping costs when cushions need to be replaced or updated. For quick moves and transitions, Mode can be easily stacked up to 10 chairs high and transported using the five-wheel Mode dolly.

Durable Design

Like all Humanscale chairs, the Mode banqueting chair was built to last. Fusing elegance with performance, it features a built-in edge guard to protect the cushions. Its legs are covered with a resilient powder coat paint to prevent cracking, peeling, abrasion and corrosion. Mode exceeds BIFMA standards, as well, demonstrating its comprehensive durability. All of these attributes promise that Mode will stand the test of time.

Mode's innovative 12-degree recline ensures a supported sitting experience.

Mode chairs can be connected together using the retractable ganging mechanism (optional).

Mode features a seamlessly integrated hand hold for easy handling and a back edge guard to protect its molded cushions.

Features

- Unique, sleek aesthetic complements any hospitality setting
- Up to 12 degrees of recline on the backrest to ensure a comfortable sitting experience
- Contoured cushions and molded waterfall seat edge support the body
- Highly modular design makes it easy to replace its parts, encouraging users to update its aesthetic without having to ship the entire chair back to the manufacturer
- Glass-filled nylon frame and aluminum legs makes the chair lightweight
- Foam cushions weighing 2.5 lbs. or less help to reduce shipping costs if they need to be replaced

- Built-in edge guard protects the contoured cushions for extra durability
- Resilient powder coat paint on the legs enhances robustness of the chair
- Durable nylon glides prevent the floor from being scratched when the chair is moved
- Numerous textile and frame options offer a variety of looks for the chair, to suit any setting or occasion
- Armrests (optional) add to the versatility of the chair and enhance the sitting experience
- Retractable ganging device (optional) allows users to connect the chairs together
- CAL133 (optional) approved for fireproofing
- Exceeds BIFMA standards
- 10-year warranty on the frame and five-year warranty on cushions and fabric

Frame color options:

- Backrest height (from seat cushion to top of backrest): 19.5" (495 mm)
- Backrest width: 16.0" (406 mm)
- Armrest (optional) height (from compressed seat cushion to top of armrest): 9.0" (229 mm)
- Armrest (optional) length (from lumbar to front of armrest): 9.1" (231 mm)
- Distance between armrests (optional): 19.0" (483 mm)
- Total chair height: 36.0" (914 mm)
- Total chair depth: 22.2" (564 mm)
- Total chair width: 19.2" (488 mm)
- Total chair weight: 16 lbs. (armless); 17.5 lbs. (fixed-arm chair)

Mode and the Environment

All Humanscale products are designed with a constant and genuine focus on our environmental impact at every stage. We believe the best designs in the world achieve more with less, and that performance and sustainability are not at odds with one another.

Our designers considered the whole product life of banqueting chairs, and realized that product repairs lead to significant environmental impacts. A modular form, Mode was designed to have its legs and cushions easily replaced. As a result, users do not have to send the entire chair back to the manufacturer. Not only does this limit shipping costs and pollution, it also reduces waste. Often, if a chair breaks, the user elects to discard it. Mode encourages users to take a more sustainable approach while optimizing their investment.

BIFMA certified and pending GREENGUARD certification

About Humanscale Humanscale is the premier designer and manufacturer of award-winning ergonomic products, including seating, task lighting, keyboard supports, monitor arms, height-adjustable tables and more.
