

WS Series Wall Mount/Swing Out Enclosures

WS Series of Wall Mount/Swing Out Enclosures provide 19" EIA 310-D compliant mounting in a heavy-duty distribution enclosure. This durable enclosure features a center swing out section for outstanding front and rear access to cables and equipment. A simple finger pull/latch mechanism located inside the enclosure opens the 18.375" deep center swing section.

Remote installation of equipment before wiring is possible with a set of optional casters. Optional casters also increase the weight capacity and stability of the enclosure.

Note: Standard unit is configured with a solid door and side panels. Total width and depth including hinges are 24.875"W and 24.688"D. Casters add 3.625" to the total height.

Two pairs of 12-24 tapped 19" EIA rails are provided with each enclosure.

The weight capacity will depend on the size of the enclosure, method of mounting and type of wall construction if wall mounted.

Listed to UL60950-1

STOCK COLOR: Black

WS SERIES WALL MOUNT/SWING OUT Enclosures

PART NO.	DESCRIPTION
GL24WS-SS	Solid Front Door & Solid Sides Dimensions: 24"H x 24"W x 24"D Wt. cap.: 250 lbs.* Rack spaces: 11 RMU Shipping weight: 125 lbs.
