WM Series Wall Mount Enclosures

WM Series Wall Mount/Swing Out Enclosures provide 19" EIA 310-D compliant mounting in a distribution enclosure. A simple finger "push-pull" type catch located inside the cabinet opens the 18.00" deep center swing section. The center swing out feature provides outstanding front and rear access to cables and equipment.

The reversible cabinet mounting design makes left or right-hand swing out possible. This convenient feature also conserves valuable wall space. Knockouts sized for 1", 2", and 3" conduit and fittings are located at the top, bottom and rear for easy wiring, installation and maintenance.

Front and rear sections lock independently for added security.

Note: GL2418WM, GL24WM, GL36WM and GL48WM are configured with a plexiglas door and vented sides. Two pairs of 12-24 tapped 19" EIA rails are provided with each enclosure.
